

## Project Lead (m/w/d) CO<sub>2</sub> Management Solutions

Do you bring technical knowledge in climate policy and/or green tech? Are you eager to leverage this knowledge to develop corporate solutions for decarbonization and CO<sub>2</sub> management? And do you want to help shape a growing company? Then this position might fit.

### You are:

- Knowledgeable in technical issues related to carbon pricing (such as CO<sub>2</sub> taxes, cap-and-trade, CBAM), carbon markets (compliance or voluntary) and/or CO<sub>2</sub> reporting (e.g., GHGP, ISO, SBTi, CDP)
- Proficient in translating climate policy into CO<sub>2</sub> management action in companies in industry, energy, buildings, transport and/or agriculture & forestry
- Data-oriented with confident use of various digital tools to analyze data and develop corporate recommendations for action
- Convincing also towards corporate decision makers with fluent communication in English and German language
- Structured and independent in the management of client projects and organizing your work around it – as demonstrated in previous consulting roles

### You want:

- New challenges where you can help shape the work and direction of a growing company in the data science and climate-space
- A role that you can form and expand into a sought-after expert in your industry or area of expertise
- Independent work with full ownership of your projects and freedom to develop new things
- A flexible role (based in Berlin), in which you can arrange your working hours and location(s) to fit your personal needs
- A dynamic and collaborative work environment where diversity, openness and trust are our core values

### We offer:

- Fully integrated business areas offering advisory and analytics for climate strategy, CO<sub>2</sub> reporting and certificate trading

- End-to-end project responsibility from customer acquisition and development, over data and business analyses to solution implementation
- Opportunities to grow with us and take on team lead roles in close interaction with our leadership team
- Insights into the joys and pitfalls of starting a business
- A startup-competitive fixed salary with a performance-based bonus

## We are:

- A boutique advisory and analytics company that makes the economics of carbon count
- Strategic enablers of decarbonization journeys and CO2 management in all net-zero relevant industry and market segments
- Data-driven analysts who bring together business-relevant data on climate policy, carbon pricing and green markets
- Trusted advisors who make tailored solutions from overarching corporate strategies to optimization tools
- A growing team with a track-record in management consulting, energy industry, (angel) investments, and international climate policy (UN and World Bank)

## Is there a fit?

Then email us your CV via [info@co2iq.de](mailto:info@co2iq.de) and we arrange a first (virtual) chat to get to know each other. More info at [www.co2iq.de](http://www.co2iq.de). Please understand that we can only answer candidates with matching profiles.
