

Working Student/Intern (m/w/d) Decarbonization Solutions

Do you have a passion for clean tech and green economy? Do you want to build expertise on corporate solutions for decarbonization and CO₂ management? And do you appreciate independent work alongside your studies? Then this position might fit.

You are:

- Enthusiastic about working on corporate solutions for the climate and environmental challenges of our time
- Interested in translating climate policy into decarbonization action in companies in industry, energy, buildings, transport and/or agriculture & forestry
- Keen to work with (large) datasets by using and learning a variety of digital tools, incl. programming
- Fluent communication skills in English (and optimally German) and able to convince other of your ideas
- Enrolled in a degree program in agriculture, engineering, natural sciences, law, political sciences or economics

You want:

- New challenges in which you can develop yourself further in the data science and climate-space
- Practical experience to build up your own expertise on economic and technical aspects of corporate CO₂ management
- Independent work with a steep learning curve where you can develop a variety of data and project management skills
- A flexible job (based in Berlin) alongside your studies, in which you can arrange your working hours and location(s) to suit your study and other personal needs
- A dynamic and collaborative work environment where diversity, openness and trust are our core values

We offer:

- A broad range of tasks from policy and market research and financial calculations to all aspects of data science related to decarbonization solutions

- A flexible role tailored to your skills and interests – in which you can grow with us
- "Learning on the job" in close interaction with our experts and leadership team
- Insights into the joys and pitfalls of starting a business
- A hybrid work environment with a working space at the heart of Berlin-Kreuzberg
- A competitive fixed (hourly) salary in the startup sector

We are:

- A boutique advisory and analytics company that makes the economics of carbon count
- Strategic enablers of decarbonization journeys and CO2 management in all net-zero relevant industry and market segments
- Data-driven analysts who bring together business-relevant data on climate policy, carbon pricing and green markets
- Trusted advisors who make tailored solutions from overarching corporate strategies to optimization tools
- A growing team with a track-record in management consulting, energy industry, (angel) investments, and international climate policy (UN and World Bank)

Is there a fit?

Then email us your CV via hr@co2iq.de and we arrange a first (virtual) chat to get to know each other. More info at www.co2iq.de. Please understand that we can only answer candidates with matching profiles.
